## SKILLS

### Skills

- Swift
- Objective-C
- Java
- Python
- Javascript

### Development

- iOS and Web Dev
- IBM Watson
- Google Firebase
- Machine Learning

## Background

I am an incoming graduate at Evergreen Valley College by Spring 2018, with an Associates Degree in Mathematics. I will be continuing my education at San Jose State University by Fall 2018 to major in Statistics and Computer Science and pursue a career in Software Engineering.

I enjoy developing software for both mobile and web platforms with the thirst for knowledge. I've gained my experience through relevant education, internships, and personal projects; many of which can be accessed through my website or my GitHub.

## Experience

### Code Coach, theCoderSchool July 2017 - present

- Teaching basic programming to iOS Development.

### iOS Developer Intern, Freshpep, — March 2017 - May 2017

- Developed and designed the FreshPep mobile application for iOS from the ground up

### iOS Developer Intern, Ren — January 2017 - March 2017

- Improved on the Run iOS Application.

### LinkedIn High School Mentorship Program, LinkedIn, March 2015 - May 2015

- Learned the basics of HTML and CSS from LinkedIn Web Developers.

### iOS Developer Intern, ESUHSD, — June 2015 - December 2016

- Developed the East Side Union High School District App.

## Education

San Jose State University, San Jose, CA — BS, Statistics and Computer Science, 2018 - 2021

Evergreen Valley College, San Jose, CA — AS, Mathematics, 2015 - 2018

## Projects

### GeekWeather (iOS)

- Elegant weather app for iOS; displaying my proficiency in iOS Development and UI/UX Design.

### FileStorks.com (web)

- An easy file sharing solution.

### SwiftlyCoreData (iOS open source)

- A library to make it easier for developers to implement CoreData.

### Spinners (iOS open source)

- A library for dynamic activity indicators.

### SnakeAI (mini web project)

- Simple snake game with AI
-
